*Note:*

*Demo this project without signup, use this login info:*
*(Username: justin and Password: test)*

- Talking-Cents is a full stack project that puts a user's thoughts to the test to see if they make the most sense. This app gives the user a social media experience that gives options to post, reply, and vote on other user's responses to a given topic.
- I was a main contributor to the backend development of this program as well as app deployment, version control, and database cloud setup. The backend portion mainly consisted of creating a secure database that stores user's login info along with their voting history, posts, and reports. User's info is kept secure with password hashing and JWT to store their current session.
- This project utilizes JavaScript, RedwoodJS, Node.js, React, Tailwind CSS, JSX, Prisma ORM, PostrgreSQL, and Netlify.

**Pantry-Pal** | **GitHub Repository:** https://github.com/itsmejustino/Pantry-Pal |
**Link to Deployed Project:** *https://pantry-pal1.herokuapp.com*
*Note:*
*Demo this project without signup, use this login info: (Email: test1@test1.com and Password: test1234)*

- Pantry Pal is a full stack project aimed at solving the problem of using wasted ingredients in your pantry. This app can search a large database of recipes via Fetch API by using a search field with criteria given by the user that can be one ingredient, a phrase, or a list of ingredients
- I contributed to this project in all areas of Front-End and Back-end Development to ensure full functionality and smooth deployment. My main contribution was implemented in the fetching of data from Edemam API, taking in search queries from the Front-end, and styling components.
- This project utilizes JavaScript, Handlebars.js, Node.js, HTML, and CSS. API fetching is done with the Node Package Manager in Node Fetch.

**Nu-Route** | **GitHub Repository:** https://github.com/itsmejustino/Pantry-Pal |
**Link to Deployed Project:** *https://pantry-pal1.herokuapp.com*

- Nu-Route is a front-end web app created to help with making exercise even easier. This app helps the avid runner with making a randomized running route.
- I implemented the functionality of the mapping and route generator system and the timer system. Google.maps assisted in the creation of the map UI and search functionality. I created the plotting system using the Haversine Formula to measure points plotted on the map to a given distance.
- This project utilizes JavaScript, HTML, CSS, Bulma, and Fetch API.

## EXPERIENCE

### HIGHLANDS RANCH COMMUNITY ASSOCIATION

### Assistant Facility Supervisor | Highlands Ranch, CO | 2018- 2022

- Exercised a high level of decision making and problem resolution to run the daily operations of a state-of-the-art top, top tier recreation facility and community center to 1500+ members a day.
- Managed, implemented, and delegated data entry and data cleanup projects with staff to eliminate entry errors and improve software performance.
- Organized written plans to ensure all data cleanup procedures and quotas were met. In addition, software errors were managed and recorded within ticketing system for System Admin.
- Held meetings and software training sessions that included technical trainings and on-screen examples. I was able to successfully educate and maintain current program processes to staff members of program changes.
- Wrote guides and technical papers to assist resource development within the department.
- Mentored and trained new incoming staff to maintain high level of customer satisfaction to streamline membership experience for 33,000 households.
- Managed many business relationships, invoicing, budgeting, and documentation. Organized meetings, walkthroughs, and follow ups while managing projects to stay under budget and maintain progress.

## LEADERSHIP

### Highlands Ranch Community Association ERC (Employee Relations Committee)

- Chair of the Employee relations committee at the Highlands Ranch Community Association. Focused on implementing ideas in a team atmosphere to increase employee appreciation and participation within work related events. Assisted with planning and executing events focused on employee appreciation.

## EDUCATION

- **Denver University**: Full Stack Web Development Bootcamp
- **Colorado Mesa University**: Bachelor of Arts Kinesiology: Health and Fitness Promotion
- **Indian River State College**: Associate of Arts
